Education

University

Bachelor of Computer Applications and Software Engineering

October 2024

Dublin, Ireland

Work Experience

Telnyx

March 2023 – Sep 2023

Product Support Engineer

Dublin, Ireland

- Provided technical support for **100+ enterprise customers** using **VoIP, SIP, and API-based services** across multiple time zones
- Resolved **30–40 support tickets weekly** while consistently meeting strict **SLA targets** for response and resolution
- Diagnosed complex customer issues using **Postman, REST APIs, SQL logs, and network analysis tools**
- Collaborated with engineering teams to resolve recurring bugs, reducing escalations by **15%**
- Authored internal documentation that decreased onboarding time for new support agents by **20%**
- Maintained a **99% satisfaction score** on post-ticket surveys through clear communication and rapid issue resolution

Dublin Airport Authority (DAA)

Jun 2024 – Present

Airport Security Unit (ASU)

Dublin, Ireland

- Conducted **passenger and staff screening** in compliance with **EU aviation security regulations**, maintaining the highest standards of safety and awareness
- Operated X-ray, ETD, and body-scanning equipment to detect prohibited items, ensuring full adherence to **ICAO and DAA security protocols**
- Handled high-pressure situations with professionalism during peak travel periods, assisting an average of **3,000+ passengers per shift**
- Recognized for consistent **attention to detail**, strong communication skills, and a customer-focused approach while enforcing security standards

Projects

Spring Boot Authentication API | *Source Code*

Spring Boot | Supabase PostgreSQL | JWT | Java

- Built a **production-ready authentication service** with **JWT-based login, email verification**, and secure stateless session handling using **Spring Security 6**
- Implemented user signup, email verification, login, and token issuance using **Supabase PostgreSQL, Hibernate/JPA**, and a custom authentication provider
- Designed a clean, scalable architecture with dedicated layers for **controllers, services, DTOs, repositories**, and **security configuration**
- Integrated **Gmail SMTP** for sending verification codes with TLS encryption and support for app-password authentication

SpotLove | *Website*

Python | Flask | MongoDB | Spotify API | JavaScript | Vercel

- Implemented **Spotify OAuth 2.0** authentication to securely log in users and fetch personalized listening data
- Developed backend logic for a **music-based matching algorithm** using Spotify's API to analyze user preferences
- Designed and integrated a **MongoDB cloud database** to store user profiles, matches, and chat data

Azure Order Processing Pipeline | *Source Code*

Azure | C# | API Management | Bicep IaC

- Built a **serverless workflow** using APIM → Logic App → Service Bus → Azure Function for end-to-end order processing
- Implemented validation, dead-letter handling, and callback Logic Apps for reliable event-driven messaging
- Provisioned all components with **Bicep IaC** and automated deployments with GitHub Actions
- Added **Azure Monitor alerts** and Application Insights KQL logs for monitoring and failure detection

Technical Skills

Languages: Python, Java, SQL, HTML5, CSS, JavaScript, C#

Developer Tools: Azure, Firebase, Postman, Git, Jenkins, Terraform

Libraries/Frameworks: Spring Boot, ReactJS, PostgreSQL, NextJS, NodeJS, Express.js, Flask, Django
